-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The final rejection dated 22 September 2004, applied to claims 11 and 13 under 35 U.S.C. 101, as claiming the same invention as that of claims 1 and 10 of prior U.S. Patent No. 6,020,586, double patenting rejection, is now withdrawn because applicant's remarks filed on 06 December 2004 rebutting this rejection has been found to be persuasive. The new art Whitehouse et al. (5,962,851) is found and applied to claims 11-13 as the following.

***Rejection Under 35 U.S.C. 102(e)***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Whitehouse et al. (5,962,851).

Whitehouse et al. (5,962,851) disclose, figs. 10 and 14, a mass spectrometer apparatus for analyzing chemical species. The apparatus includes a time-of-flight mass analyzer 127; an ion pulsing region 135; a detector 131; an ion source 112 for forming an ion beam 134; a two-dimensional multipole ion guide 118 having an entrance end and an exit end, and formed of a plurality of spaced apart rods parallel to each other and an axis of the ion beam 134; electrostatic lenses 123, 124 and 125 controllably applied by the time of pulsing period for pulsing ions transferred into the pulsing region

135 to the time-of-flight mass analyzer 127; and an exit lens 120 for gating the ions in the ion guide 118 to prevent excessive charge buildup in the ion guide 118 (see col. 15, line 32 to col. 19, line 9).
